

Cube 46

Date

2006

Primary Maker

Larry Bell

Medium

amber coated glass

Description

The square glass cube is composed of six sheets of amber coated glass each measuring 20 3/16". Bell cubes and work are associated with Light and Space, a group of mostly West Coast artists whose work is primarily concerned with perceptual experience stemming from the viewer's interaction with their work. The cube sits on a clear pedestal and works both as mirrors and windows, sometimes simultaneously.

Dimensions

20 3/16"x 20 3/16"x20 3/16"
